Integrated dual microphones

Bluetooth Portable NFC Speaker

A600

The A600 makes for an impressive sight with its minimalist design in a high-grade aluminum enclosure. This gives the speaker a nice quality weight and also forms the casing of the actual speaker unit which is available in 5 colors. The integrated Li-ion battery is rechargeable

via micro USB and packs enough power for around 10 hours of uninterrupted music pleasure, which is greatly enhanced by the Radiation Airflow Technology. The battery life combined with the compact size make the A600 the ideal accessory for all smartphones and tablets.

► Bluetooth 4.0 audio transmission

Wireless high-fidelity enjoyment: The latest Bluetooth 4.0 technology offers reliable audio transmission with incredible sound quality for smartphones and all other Bluetooth-equipped devices. With 360° coverage and a range of up to 10 m, you can enjoy maximum freedom.

► Radiation Airflow Invert Technology

Gutsy bass: This technology uses the backward pressure energy of the active speaker and runs it through passive speakers, thus enhancing the lower frequencies to deliver richer and more powerful bass.

► Speakerphone Functionality

Thanks to the integrated microphone, you can use the A600 as a speakerphone for phone calls, conference calls or VoIP chat. It detects incoming calls and automatically switches between music- and phone-mode.

► NFC Quick-Connect

Pairing made easy: Simply hold your NFC-equipped device to the speaker and the connection is established automatically. Even when your Bluetooth on your device is turned off.

Specifications

- Bluetooth 4.0
- NFC quick connect
- Radiation Airflow Invert Technology
- Integrated dual microphones
- Speakerphone functionality
- Dual-Mode: Wired or wireless mode
- Multipoint Connection
- 3.5 mm headphone connector
- Rated power: 2x3 W
- Frequency range: 150 Hz~20 KHz
